SKILLS

- Machine tool technology expertise
- Data trending
- Data extraction using selenium and Beautiful Soup
- Map data analysis
- Data analysis and reporting
- Process development
- Data collection and analysis
- Data Visualization.
- Customer service
- Python, Java, Pandas, SQL and HTML
- Tableau , Snowflakes ,Deep learning in ML ,snowflake ,Mango DB ,Excel and SAS

CERTIFICATIONS

- Data Science certified

DATA SCIENCE IN MACHINE LEARNING

- Extracting the Data from the websites using Beautiful Soup and Selenium approach.
- Choose one or more potential models and algorithms
- Design data modeling processes to create algorithms and predictive models and perform custom analysis
- Manipulate large data sets and use them to identify trends and reach meaningful conclusions to inform strategic business decisions
- Identify trends in data sets
- Clean, aggregate, and organize data from disparate sources and transfer it to data warehouses.
- Identify patterns in data. This includes having a keen sense of pattern detection and anomaly detection.

Responsible Data Analyst, passionate about delivering outstanding quality and service. Offering 9 years of experience in industry with history of recognition for performance.

EXPERIENCE

January 2022 to Current
Data Science in Machine learning *Flip Robo*, WFH
- The purpose of the Project is to scrap the Data from the websites like flip kart , Amazon using Beautiful Soup and Selenium .
- Data Processing and cleaning
- Analysis the Data set and cleaning.
- Data model creation and visualization.
- Data Frame creation using numpy and pandas library.
- Processing, cleansing, and verifying the integrity of data used for analysis
- Selecting features, building and optimizing classifiers using machine learning techniques
- Design data modelling processes to create algorithms and predictive models and perform custom analysis
- Hands on Experience with Tableau .

February 2020 to Current
Director Fellow *Whitehat.jr*, WFH
- Build methodologies and standards to prepare, extract, and analyze different data variety of data sources under the guidance of tech lead
- Participate in all aspect's requirements gathering, data acquisition and preparation, hypothesis generation, idealization, coding, testing, and deployment of data driven solution
- Be able to organize, manage, and analyze varied and large data sets, then connect dots and identify solutions and suggestions that can help our team reach its goals
- Write and speak about technical concepts to business, technical, and high-level audiences and giving data-driven presentations
- Timely deliveries while working on project , Use data science toolkit (Supervised, unsupervised models, reinforcement, and probabilistic machine learning models) & data visualization techniques like Tableau , Power BI and SAS

Tableau Analysis -
- Research and develop statistical learning models for data analysis
- Collaborate with product management and engineering departments to understand company needs and devise possible solutions
- Keep up-to-date with latest technology trends
- Ability to understand a problem statement and implement analytical solutions & techniques independently or with minimal supervision

March 2015 to October 2017
Data Analyst *Eclerx Services*, Pune
- Acted Team Leader and Point of contact between the technical team

- Implement algorithms and statistical models to enable a computer to automatically learn from data.
- Find analytical solutions to abstract business issues.

and business users that helps the line of service teams manage their operations.
- Acquired methodical knowledge of reporting and creating Maximize Dashboard for across the globe for above 10,000 bundles.
- Generating reports on data from daily price monitoring tools run for across the globe and monitoring the same with the dell live site.
- Acquired methodical knowledge of quality management of a consumer store page.
- Worked for the projects right from the scrap to a state wherein it is completely stream lined.
- Coordinator between contact between the technical team (store page creator) and business users that helps the line of service teams manage their operations.

February 2014 to May 2015
Sales Quality Manager *Deccan Honda*, Aurangabad Pune
- Leading the Dealership, Handling Back Office and Front Office Team.
- Depending on the Dealers quality rating the sales and service records in a certificate.
- Representing the Branch in Seminars and Meets with Presentations and Reports.
- Interviewing the sales Team.
- Developing reports and analyzing it with graphs and presentation .
- Presenting the reports to clients .

May 2007 to August 2009
Sr .Customer service Executive *Manisha Infocom Pvt.Ltd,*
Aurangabad
- Handling dealer's queries and concern through E-mail and calls.
- Communicating with Skoda clients for solving customer concerns .
- Evaluating quality of dealers rating coordination with Skoda client.
- Tracking sales and service records of all India Skoda dealers and reporting them with their performance.

EDUCATION

2010
Masters in Computer Science Computers
Bamu University, Aurangabad

2008
Bachelor of Computer Science Computers
Bamu University, Aurangabad, MH
